

JohnPac offers multiple containers and ancillary solutions for storing, shipping and sampling liquids, viscous products, and chemicals for the oilfield service sector. Our containers are an excellent source for down hole fluids and degreasers as an example.

SOME OF OUR CONTAINER PRODUCTS

- Steel drums (UN and non-UN applications)
- Plastic drums (open or tight head)
- Fiber drums
- Plastic open head pails with lids
- Carboys "Jerricans"
- Metal tight head pails
- Pail openers
- Plastic jugs
- Collapsible Jugs

MARKETING AND BRANDING

Packaging can be used for more than transporting your product. Consult us on branding opportunities for your container solutions. Our experts will work with you on printing graphics such as your company's logo and safety information.

CUSTOMIZATION!

Need a specific size, color, or text on your containers? Consult us on your special needs so we can deliver your perfect storage and transportation solution.

INDUSTRIAL DRUMS

Steel drums are perfect for heavy duty storage needs. They are available for both UN and non-UN applications, such as chemicals, paints, and coatings. Steel drums come in standard 30-55 gallon sizes, and the universal drum size has a capacity of 216.5 liters per gallon. We also offer an 85 gallon over-pack drum that can hold a 55-gallon drum in the event your original becomes damaged and its contents need to be contained. Open or tight-head options are available.

Plastic drums offer the advantage of rust resistance, the ability to be stacked and reused, and have easy-to-clean interiors. They come in 30-55 gallon sizes. Open or tight head options are available.

Fiberboard drums offer the advantage of corrosion resistance with poly or foil lining the interior. Due to their light weight, fiberboard drums are a cost-effective solution when shipping your contained product. Our fiberboard drums come in 15, 30, and 55 gallon sizes.

SHRINK BAGS

Protect your cargo with our shrink bags. Our shrink products are heat shrinkable up to 40% with reflective shine and cost-effective.

SHIELD AGAINST WIND, MOISTURE, TURBULENCE

CARBOYS AND PAILS

From liquids to solids, JohnPac has the containers to fit your needs.

- **Carboys:** 5 or 6 gallon sizes with or without caps
- **Jugs:** 1 quart-1 gallon with collapsible options available
