MARKETING AND BRANDING

Packaging can be utilized as much more than a vehicle to protect your product. Consult us on branding opportunities for your boxes. We can provide you with custom dielines that will elevate both the fit and appearance of your packaging and print quality.

BOX STYLES

- RSC
- Die cut
- Hsc
- Telescoping
- Self-lock
- Pop-lock
- Bulk
- and more...

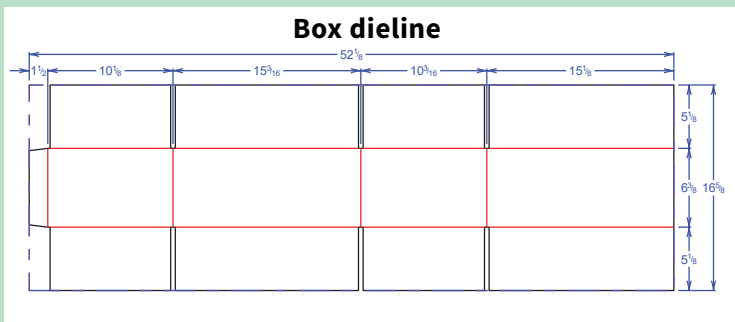

CORRUGATED BOX ENGINEERING

We take the guess work out of deciding which box will best protect your product.

We offer expert consulting on:

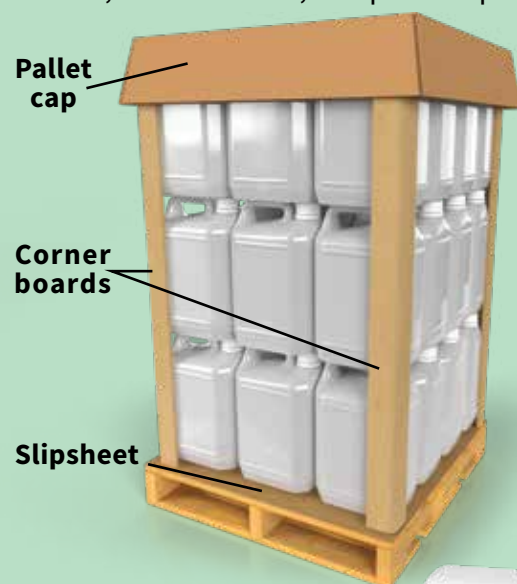

- Fluting types (A, C, B, & E)
- Single face, single wall, double wall, triple wall and lamination
- Edge crush test factors (ECT)
- Mullen bursting test (for products that can easily puncture through boxes)

JohnPac supplies corrugated boxes for food and beverage, medical, agriculture, oil and gas, resin, chemical, consumer goods, and industrial packing industries.

CORRUGATED PACKAGING PROTECTION

Protect and brace your bundled merchandise on a pallet with inexpensive corrugated options such as sleeves, corner boards, and pallet caps.

Wrap with JohnPac stretch film

PROTECTIVE PADDING

Empty space can damage your cargo by exposing it to crushing, sliding, vibrations, and abrasions. Protect your product with a wide range of fillers, liners, and cushioning options. We offer protective products such as countour buffer dunnage panels, inflatable dunnage air bags, or corrugated honey comb void fillers.

STRETCH FILM PROTECTION

Secure your merchandise on a pallet with stretch film. We carry hand and machine film in a variety of sizes, gauges, and color. We also sell and service Lantech® stretch wrapping equipment.
